

Student Academic Integrity, Intellectual Property (IP), and Consent Agreement

Course Code: [ELG 6131 / BMG 5111 / DTI 6302](#)

Course Title: [eHealth, mHealth and Telemedicine](#)

Institution: University of Ottawa

Instructor: Dr. Ali Abbas

Semester/Year: [Fall 2026](#)

1. Purpose and Academic Integrity

This Agreement establishes the terms governing academic integrity, intellectual property ownership, and consent for the use of coursework materials within this course. It is intended to prevent any future disputes related to authorship, plagiarism, ownership, or reuse of work produced as part of course activities. By enrolling in this course and signing this Agreement, I acknowledge that all submitted work must be my own or my team's original effort unless explicitly stated otherwise. I agree that proper citation must be provided for all external sources, including code, datasets, figures, and text. I understand that any form of plagiarism, misrepresentation, or unauthorized collaboration constitutes a violation of academic policies and may result in disciplinary action.

2. Course Work, Reproducibility, and Intellectual Property

I understand that course projects may involve reproducing published research results, implementing existing methodologies, or working on research problems defined by the instructor. I acknowledge that reproducibility is a standard academic practice and does not constitute original authorship or ownership of underlying research contributions. I further acknowledge that all materials provided by the instructor, including datasets, source code, models, algorithms, experimental setups, and research frameworks, are the exclusive intellectual property of the instructor, the instructor's research team, and, where applicable, Intelligent Digital Solutions, and that I acquire no ownership rights over such materials.

I agree that any work developed by me as part of this course, including code, models, reports, experimental results, figures, and system implementations (collectively referred to as "Coursework Output"), is created under the supervision of the instructor and within the intellectual and technical framework defined by the instructor and associated entities. To the fullest extent permitted by applicable laws and institutional policies, I hereby assign and transfer all intellectual property rights in such Coursework Output to the instructor, the instructor's research team, and Intelligent Digital Solutions, including all rights to use, reproduce, modify, distribute, publish, and commercialize the work. This assignment is irrevocable, royalty-free, and worldwide.

I understand that I retain limited rights to use my work for personal learning, academic portfolios, CVs, and future academic submissions with proper acknowledgment. However, I may not independently publish, commercialize, distribute, or publicly share the work without prior written approval from the instructor.

3. Authorship, Consent, and Use of Work

I acknowledge that authorship in academic publications is based on substantial intellectual contribution and that participation in coursework activities, including reproducing results, implementing existing methods, or generating figures and reports, does not by itself qualify for authorship. Any authorship consideration will be explicitly discussed and agreed upon in writing prior to publication. I provide explicit

consent for my Coursework Output to be used by the instructor, the instructor's research team, and Intelligent Digital Solutions for academic, research, teaching, and commercial purposes, including publications, system development, and product integration. I understand that such use does not entitle me to authorship, ownership, or financial compensation unless explicitly agreed otherwise in writing.

I also agree to maintain the confidentiality of any materials provided during the course and to use them strictly for academic purposes. I understand that any disputes related to authorship, intellectual property, or use of coursework materials will be resolved in accordance with institutional policies.

4. Acknowledgment and Agreement

By signing below, I confirm that I have read and understood this Agreement in full and agree to abide by all its terms. I acknowledge that coursework conducted under this course does not establish any claim to authorship, ownership, or intellectual contribution to pre-existing or instructor-led research beyond what is explicitly agreed in writing, and that failure to comply may result in academic or disciplinary action.
